

DATA SCIENTIST

We at Aivan are dedicated to making contract management as easy as possible. Aivan.ai is an AI-based cloud service that receives, processes and stores any types of contracts with minimal effort from you.

We aim for a high degree of automation in extracting contract metadata from documents (typically scanned PDF files), as well as other related tasks dealing with legal texts and documents.

Depending on your proficiencies and interests, your tasks might be some of the following:

Analyze and build NLP models for extracting data from unstructured texts.

Improve existing CNN models, or build new models, for semantic structure extraction of document images.

Investigate and fix performance bottlenecks in our current data processing pipeline.

We use pytorch and Python extensively for experiments as well as production code.

We value:

- Studies in mathematics, statistics, Natural language processing, Economics or related quantitative field.
- Experience in Python. Or strong willingness to learn it.
- Strong proficiency in English language

Salary and working conditions:

- Salary: 2800 euros/month
- Duration of the working period: 3 months
- Starting date: negotiable
- Working hours: flexible
- Workplace: Kairiskulmantie 12, Piispanristi (Piispantorni) / remote work
